## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2 and 5-8 are drawn to a filtration process to remove hardness, classified in class 210, subclass 793.
  - II. Claims 3-4, drawn to a filtration process, classified in class 210, subclass 767.
  - III. Claims 10-13, drawn to a filtration apparatus, classified in class 210, subclass 321.6.
  
2. The inventions are distinct, each from the other because of the following reasons:
  - Invention III and each of Inventions I-II are related as apparatus and processes for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the processes of Inventions I and II can be practiced by another materially different apparatus e.g. an applicant that does not require the controllable CO<sub>2</sub> addition system and claimed CO<sub>2</sub> passageway of Invention III.
  - Inventions I and II are related as subcombinations disclosed as usable together in a single combination. See MPEP § 806.05(d). The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions have separate utility as follows:
    - (i) the filtration process of Invention I does not require the feed velocity step of Invention II; and

Art Unit: 1723

(ii) the filtration process of Invention IV does not require the flow reversing step of Invention III.

3. Restriction for examination purposes is proper because of the reasons given above and also because (i) they have acquired a separate status in the art as shown by their different classification, (ii) the search required for the respective groups is not necessarily required by each of the other groups, and (iii) their subject matter is recognized as divergent.

4. A telephone call was made to the office of Bereskin & Parr in March 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
